

ENSF 607 - Final Project - UML Diagrams

By: Michael Lasby & Tong Xu

Submitted: November 18, 2020

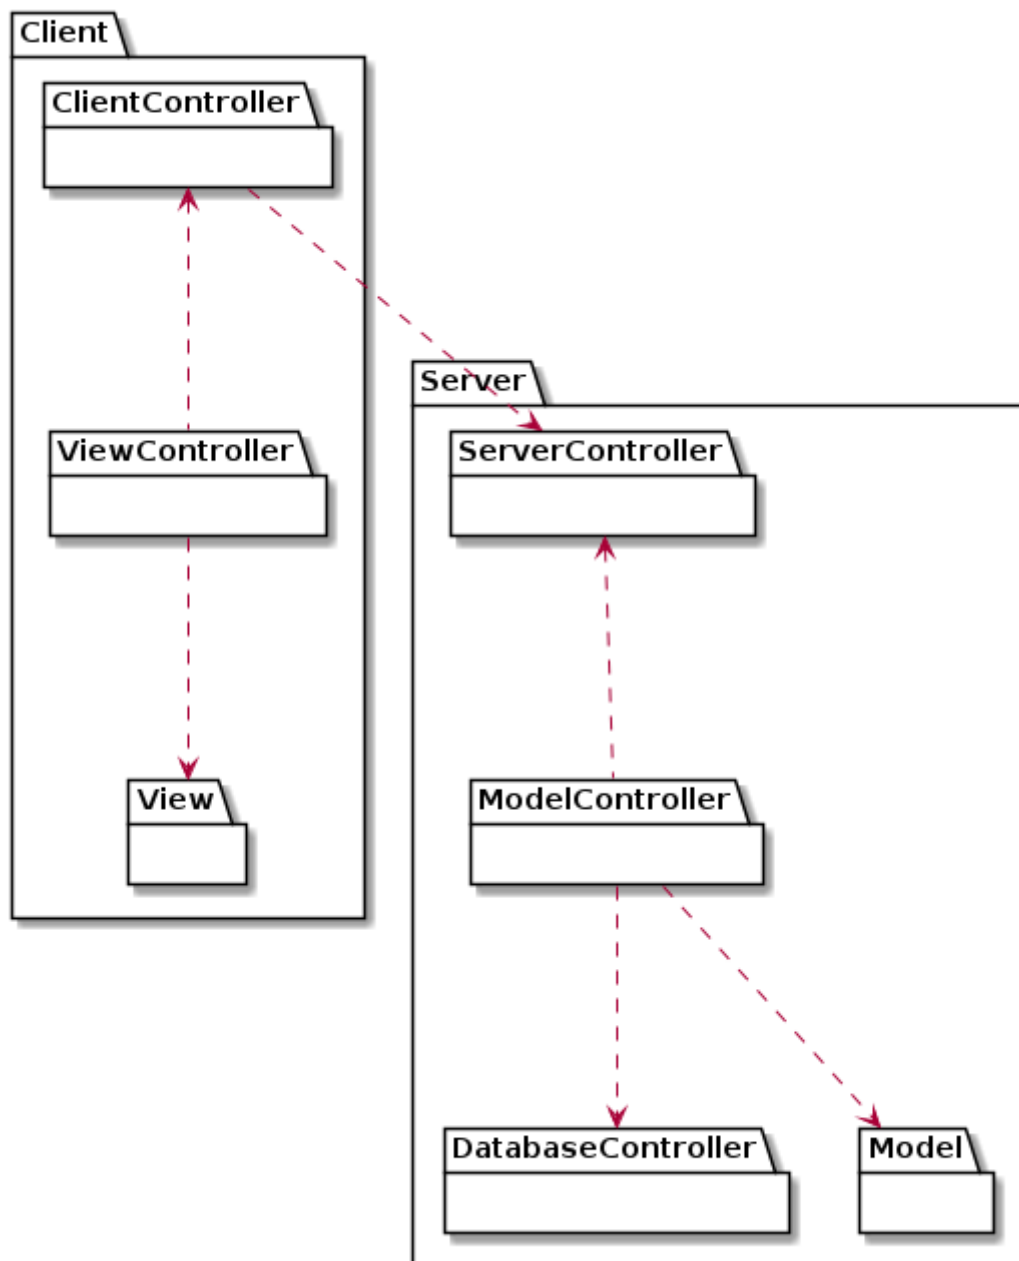

Summary

Please find enclosed five (5) UML model diagrams for our ToolShop Application design. The diagrams include both high level and low level models to ensure each diagram is easily understandable and concise.

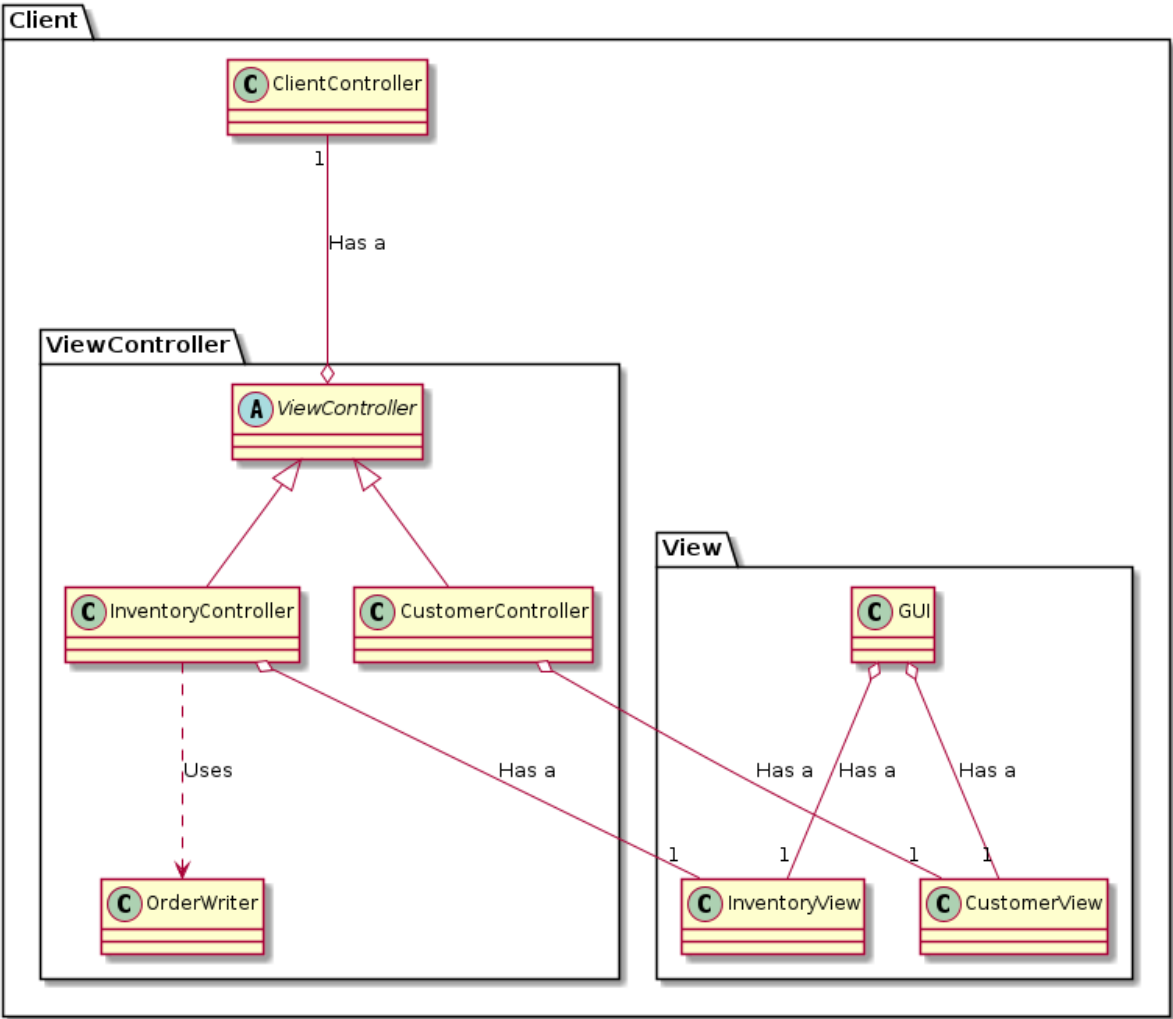

Please note that we intend to use the JSON to pass data between the server and client; therefore, no client side model or serialization helper classes are required.

The diagrams are presented below in order of high level to low level.

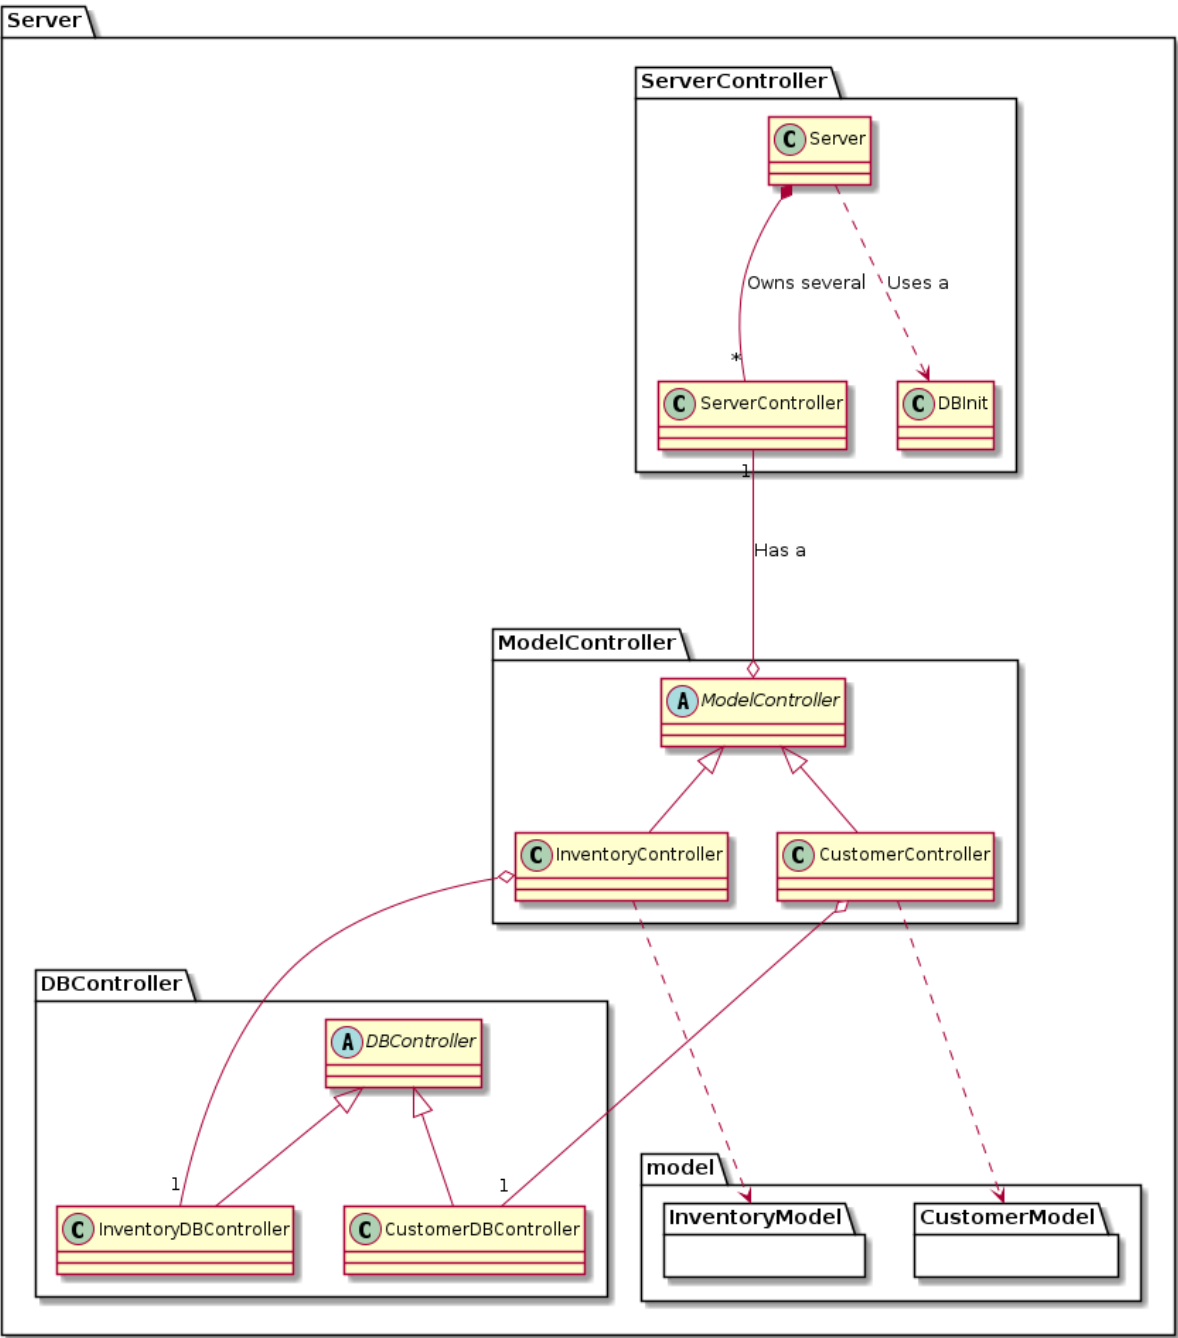

Package Diagram

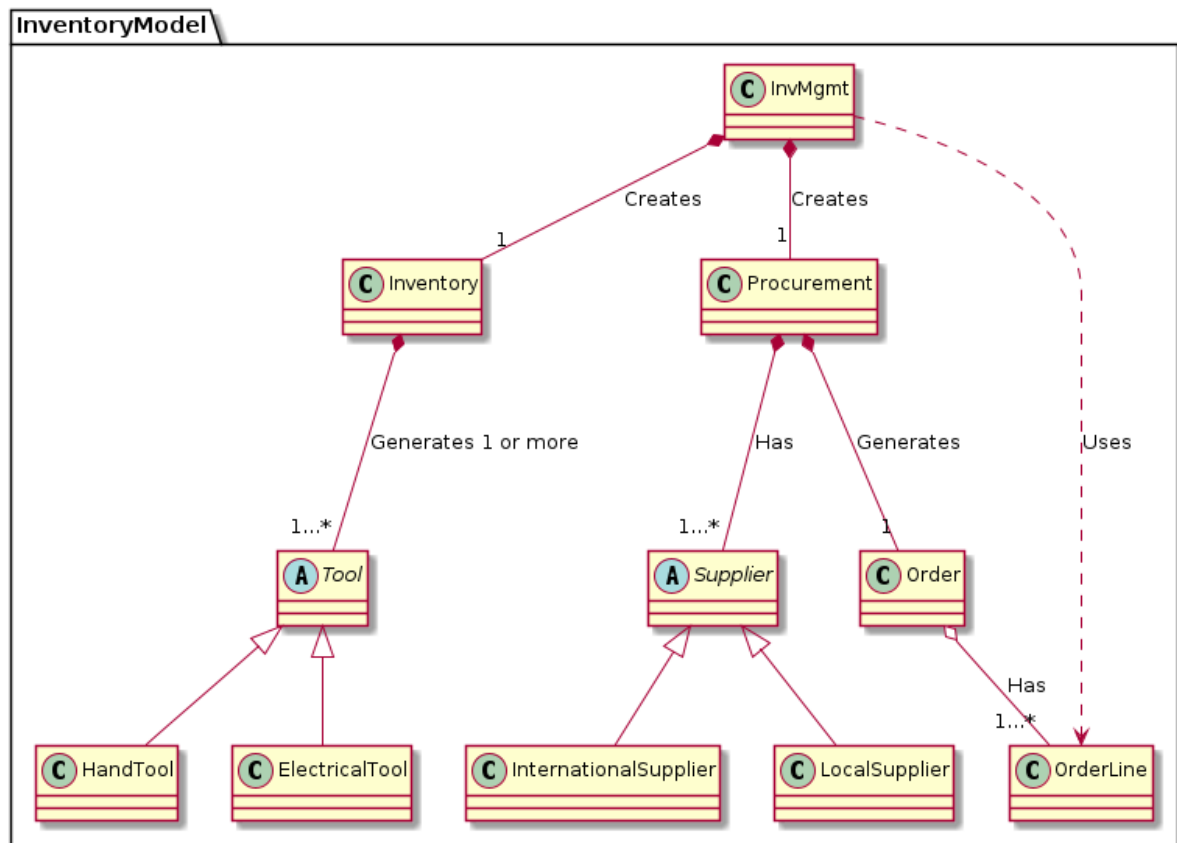

Client Package

Server Package

InventoryModel Package

CustomerModel Package
